Dear Ray,

I am a resident at () There is a very old and unsafe road barrier at 3700 block of Marine Drive that would not hold back a car if it hit the barrier while driving either direction along this corner. Below the barrier is a high cliff and ocean. I strongly suggest that a proper barrier be put in place which will prevent a future accident and death. If one hits that barrier there is not much hope that one would not go over the edge - I am surprised that your department has not seen fit to replace it. I think I contacted WVD many years ago and seem to remember that WVD said it would replace it, but never did.

I have attached a photo that I took from my car. I look forward to your reply.

Regards,

()
