**Subject:** snow removal

I know that this snow fall is taxing the municipal resources but it seems that people who live in cul-de-sacs (CDS) are not getting the same service as people who live on connected streets.

I pay about \$12,000. a year in taxes to all levels of government plus all the user fees for utilities and just because I live on a CDS shouldn't mean that I get less service. I called the public works about this and was told that the department was not clearing any CDS's in the district as it was too time consuming. It is as simple as driving into the CDS and backing out - no need to clear the whole thing --- what if there was the need for emergency vehicles to access a CDS ?
