Subject: Pipe Creek at Gisby Street

These pictures are at the top of Gisby St. where it enters the cul-de-sac. For 37 years I have attempted to get regular maintenance to prevent this growth from the creek encroaching on the road as it obscures the vision of motorists. It is worse now as these photos were taken on July 2 which was about the time I phoned to have this cleared. Nothing has been done.

This years excuse was about budget constraints & manpower shortages which are not my problem. You can imagine my shock when about a week ago I observed the new landscaping of traffic islands on Westmount. Where did the money & manpower come from?

I should not have to go through this each & every year.

Thank you for your attention.
