

COUNCIL CORRESPONDENCE UPDATE TO APRIL 21, 2021 (8:30 a.m.)

Referred for Action

- (1) April 11, 2021, regarding “Arts Centre” (Referred for consideration and response)**
- (2) April 14, 2021, regarding “Re: HSB Bike lane disaster ahead” (Referred for consideration and response)**
- (3) April 19, 2021, regarding “Notes and Comments to the Upper Lands Report to Council for consideration on February 8, 2021” (Referred for consideration and response)**
- (4) April 20, 2021, regarding “Idea from 6 year old” (Sea Bin) (Referred for consideration and response)**

Referred for Action from Other Governments and Government Agencies

No items.

Received for Information

- (5) 2 submissions, April 14, 2021, regarding Aftermarket Exhaust Systems**
- (6) 4 submissions, April 14-19, 2021, regarding Preliminary Development Proposal for Inglewood Campus of Care**
- (7) Moms Stop The Harm, April 15, 2021, regarding “Thank you!” (Overdose Crisis)**
- (8) HUB Cycling (2 submissions), April 15 and 20, 2021, regarding Cycling Events and Advocacy**
- (9) 2 submissions, April 16, 2021, regarding COVID-19**
- (10) 2 submissions, April 18 and 19, 2021, regarding Wireless Technologies**
- (11) April 18, 2021, regarding “Redevelopment of 22nd St and Bellevue”**
- (12) Mulgrave School, April 20, 2021, regarding “Harry Jerome Track at WVSS”**
- (13) West Vancouver Chamber of Commerce, April 20, 2021, regarding Federal Budget 2021 Update with MP Patrick Weiler (April 28, 2021)**

Received for Information from Other Governments and Government Agencies

- (14) P. Weiler, M.P. (West Vancouver-Sunshine Coast-Sea to Sky Country) (2 submissions), April 14 and 15, 2021, regarding Federal Programs and Initiatives**

Responses to Correspondence

- (15) Manager of Bylaw & Licensing Services, April 15, 2021, response to D. Marley regarding “COVID rampant locally - Time for more enforcement of guidelines”**
- (16) Manager of Legislative Operations/Deputy Corporate Officer, April 19, 2021, response to Moms Stop The Harm regarding “Motion on Overdose Crisis”**

Hello,

If possible I would appreciate your assistance in obtaining more detail on the proposed WV art centre. Particularly interested in whether this is a community driven project and if not why is the municipality moving forward with what appears to be a fait de compli?

Thank you

Hi Planners, Mayor and Council

I did not receive an email response regarding the drawing and 1 block bike lane hazard. I sent it through before they painted it on as we had to alert you to the dangers.

Here's the first post from another long time resident from the HSB FB page, and 25+ unhappy comments.

Let me know if you would like to see the rest of them? We can't stress enough that is idea that was NOT on the streetscape drawing is a NEW safety hazard. Do we need to show you an example?

Thanks,

Hi Mr. Wells & Mr. Bailey,

"The intention of the Streetscape Design Guidelines is to enhance livability, bolster economic activity and enable local businesses to compete with other retail centres, foster a unique and distinct sense of place, create public space for programming, **prioritize pedestrian use**, and exemplify the District of West Vancouver's commitment to sustainable development. "

As a HSB resident [REDACTED] s. 22(1) years I am confused at the placement of the proposed bike lane. [REDACTED] s. 22(1) that like to purchase Chinese food and the moment [REDACTED] s. 22(1) will be escorted out of her car to enter the restaurant she could be hit by a cyclist.

As well, [REDACTED] s. 22(1) who has a child in a care seat & stroller and they will be taking the baby out of the passenger side and placing the stroller on the *non-existent sidewalk* AKA the BIKELANE and then will be taken out by a cyclist.

The gathering place is on the corner - many residents, locals and tourists gather at the corner of Starbucks and now you have it set to put cyclists running right through at the crosswalk where pedestrians are waiting to cross the road. It's a crosswalk. Please come down to the village and we will show you how the pedestrians cross the street.

Here's the ironic part The cyclists, who make the village their "turn-around destination" are very experienced and will not use the 1 block bike lane. The path of their travel is not going to have them go between parked cars, pedestrians and a cross walk. They will start at the top of Royal and curve all the way to left and speed down (we can see their speed on the sign) Royal to Bay. *They are not going to slide over to the right for 1 block.* I encourage you to sit and watch on a Sunday to see what the bike traffic actually looks like in reality. I would appreciate reply to myself and the WRA. These plans do not show a bike lane and as a supporter

of improvements and one who [REDACTED] s.22(1), this is a ghastly error you will regret.

IMAGE #1 In the proposal it is called a curbside strip not a BIKELANE

<image001.png>

IMAGE #2 no BIKE LANE shown

<image002.png>

IMAGE #3 NO BIKE LANE

<image003.png>

Cheers,

Mayor & Council

Jim Bailey
 Director of Planning and Development Services

Nicole Olenik
 Project Co-Manager, Planning the Upper Lands

District of West Vancouver

Dear Mayor & Council, Jim Bailey and Nicole Olenik,

I am looking for response to my email of February 5/21, forwarded again below.

For everyone's convenience I have abbreviated that text by way of bolding, in purple, **the pertinent comments** and then expanding to large font size the **question(s)** following the comment.

Of the self-same subject matter, my emails which have now fully matured at almost 2 years old, pose specific questions regarding hydrology and development above the highway, yet have never been referred to or responded to. Could someone please explain how or why this is?

How can development proceed, especially if there are **any** trees being cut down, without clarification of this planning being made available to the citizens of West Vancouver?

I look forward to learning more!

With kind regards,

District of West Vancouver

Dear Mayor and Council, Jim Bailey and Nicole Olenick,

Notes and Comments to the Upper Lands Report and Recommendations of West Vancouver District staff Jim Bailey and Nicole Olenick, dated January 22, 2021, for presentation to West Vancouver Council February 8, 2021:

Re: Recommendations:

As evidenced by comments from the public, the decision as to whether to proceed with Approach A versus B is not yet solid. The survey conducted during November/December of 2020 steered the public to one or the other, of: accepting 3500 units with all of Eagleridge protected, together with the uncertainty found in the multi-paged documents regarding the Inter Creek area; versus 2500 units with the potential for future further protection beyond the immediate protection of 1/2 of Eagleridge and, of Inter Creek (?).

Even though 66% of people chose Approach B and 33% of people chose A, I know I am not alone, amongst both those who did and those who did not participate in the survey, in needing more information as to what impact those 2 different Cypress Village scenarios would have on the land, the forest, the riparian areas, and on the downstream communities who share these natural assets.

Naturally, direction is being sought in order to proceed efficiently and with clarity. BPP does not want to waste their money, and I too as a property taxpayer also want for my money to not be wasted. I wish for no waste. **No trees to be cut down in error, no encroachment on riparian areas, no loss of ecological features which have been enjoyed for centuries. Even though BPP is to pay for the planning process, existing neighbourhoods and existing citizens do exist and remain for reasons that are highly relevant and valuable, reasons which are, honestly, at risk if not handled carefully.**

Further disclosure is required from the 'planning team' prior to making a selection decision on Approach A or B. Phase 2 must include this further decision making, which will be founded prudently and critically on economic and geophysical development logic with protection of ecology first and foremost.

Re: Purpose:

Going forward to Phase 2 with a decision as to Approach A or B requires an intermezzo first, to have made clear **the impact to the environment and to downstream neighbourhoods, as listed in the authors' Conditions and Strategic Objectives.**

Re: Main Objectives:

I trust that the ultimate objective is to create opportunity for people to find a sense of place and home, within a positive framework of social community and nature, without compromising the integrity of either. **How the numbers play out can only be realized after all the ecological factors and protections have first been met.**

Re: Main Themes:

I feel **a glossary of terms is needed, for instance to clarify a 'conserved area' and a 'preserved area'. Are there not some of the Eagleridge lands to be 'preserved'? And do we not want all areas to be 'protected' at this stage of ecological awareness, really?** With the arrival of the adjective or descriptor "urban" having now entered (the conversation), this term needs more explanation. Whereas Cypress Village was always referenced as "sustainable" and "compact" it is now also "urban". **Did this occur when the number of units migrated to 3500 from 2500? My previous sense of an 'alpine village' is now unsettled; as urban relates to a city or town, not to a village; I would say to Ambleside but not to Dundarave or Caulfeild. What are the paramaters of "urban" as we the readers are to understand? What real development pressure is being brought to bear on the landscape of the Cypress Village site?**

Re: Legislation:

In accordance with OCP Bylaw 4985,2018, of identifying the approximate location, amount, type and density of development, is it not possible to proceed either into an intermezzo (as above mentioned), or into Phase 2 with the first work at hand to still yet determine which Approach to take, based on further specific ecological information? [Do You

agree that] at present the measure and specifics of ecological consequences are not defined adequately enough to be able to make a prudent decision of such weight [(ie. an "urban centre" including 3500 units)?]

The author(s) of this UL report advise that "the District of West Vancouver endorsed the Regional Growth Strategy, Metro 2040, and the District's Regional Context Statement in the OCP includes policies of ... creating a compact urban area ... and ... protecting the environment ...".

Is this [policy] relative to West Vancouver, to Ambleside, or to building an 'urban' area amongst the critical and sensitive Upper Lands watersheds?

Re: Section 4.0 Council Conditions:

Under Local Government Act s.488 (1) (a), (b), (e) and (f)

" - require variations and restrictions to site and building layout in order to minimize disturbance of the natural site conditions and to moderate the impact on views of and from the site,

- extensive mature forest cover ... parklike setting, sensitive habitat and ground conditions, as well as issues of drainage, erosion and flood hazard,

- difficult terrains ...

- variations in siting of land uses ...

- a range of climate conditions ...

- extensive creek areas that require appropriate set-backs and control or prohibition of development ..."

Very good!

Re: Section 4.0 Council Strategic Objectives / OCP:

Responding here again to the wording at this section of the Upper Lands / Cypress Village report to Council, of "a compact, sustainable, urban community in Cypress Village ..." ? Why is this separate, distinct and destination village not described as rural? This is in keeping with the original intention. An elementary school suitable to this population base is rural, village scale. A stopping point for visitors coming to hike or bike, is to a rural village, modern for sure, but not urban. No?

Under Local Government Act s.488 (1), as stated in the OCP Bylaw 4985,2018 - "the submission must locate and describe important natural features of the site, proposed changes to the natural topography, vegetation and the potential visual impacts of such changes. ...

- provide for the protection of the natural environment, its ecosystems and biological diversity,

- provide for the protection of development from hazardous conditions,"

Yes to the genuine protection for sure; and the development wishes to be free of hazardous conditions, including what is forced to become hazardous by human invention, yes?; and importantly, areas outside of the development also wish to be protected from freshly created hazardous conditions. [Why does the content of the Upper Lands Planning material seem not to focus at all on existing, down-slope neighbourhoods?]

On Page 86 of OCP Bylaw 4985,2018 -

- siting and square foot variations to reduce impact on the terrain

- tree management scheme which identifies the means and extent of tree retention or replacement required to maintain a park-like character, ensure proper drainage and minimize view impacts,

- provide storm water drainage detention where appropriate and incorporate storm water management techniques that protect the environment."
- " street lights".
- "environmentally sustainable building design".
- "allow for spacing between building clusters to provide opportunities for extensive landscaping".
- "natural built form to topography".

All of these are of most important stature! What storm water techniques are being considered?

Re. **Section 5.2 Financial Implications of Plan Adoption and Implementation:**

" ... there may be a need for the District to reduce the total amount of amenities paid for by BPP in Cypress Village in order to achieve protection of all of BPP's lands in Eagleridge. "

Further reason for more ecologically based information to precede the decision on Approach A versus B, as following this course is where the prudent decision will naturally be found.

Re: **Section 7.1.3:**

1. Protect the UL west of Eagle Creek (Eagleridge and Inter Creek) for Conservation and Recreation.
2. Create compact, sustainable, urban communities in Cypress Village and Cypress West. "

See comments above regarding the need for a glossary of terms - e.g. the missing reference in the UL documents to actual preservation of areas of Eagleridge; and the accurate definition of "urban village".

I expect and support the re-zoning for multi-family, and duplex residences will undoubtedly increase in order to meet these goals.

While at the same time appreciating the thoughtfulness and detail outlined in the Upper Lands Watercourse Protection Guidelines on Page 87 of the OCP Bylaw 4985,2018, such as found at:

" c. In order to achieve no net loss of riparian habitat, keep free from development the area within 30M of the top of the permanent watercourse bank.",

it is necessary for citizens who care, to be involved in the development planning process to ensure that alteration, such as the 30M protected riparian area becoming 15M, does not happen in order for the "no net loss of riparian habitat" to be obliged - [do You agree?]

and at Page 90 of this same OCP document:

" Context and Site Design -

1.05 ... resilient natural environment including healthy, properly functioning watercourses.

1.07 ... integrate with area-wide stormwater management strategies and features including cisterns, retention or detention features, and absorbent topsoil specifications.

1.08 ... tree management plan ... to maintain the mountain forest character of the area, ensure proper drainage ... "

Modern science and age-old earth wisdom must both be applied so that we can avoid another 5 Creeks Diversion Project 5' diameter stormwater pipe, when other solutions are available and proven globally to succeed. [What is the current mandate for a modern, natural hydrology based approach in contrast to the 5 Creeks Diversion Project approach?]

further, under

" Building Design and Services -

" 2.07 ... address climate and solar orientation ... "

I trust that the imperative is to fully integrate autonomous and functioning renewable energy systems now, and not issue permits to these considerations 'for the future' - [yes?]

I appreciate having been provided the very interesting, working group maps from 2013 and 2014, at the westvancouverite / planning the upper lands website. They are great! I trust the concept is to in no way repeat building as what has occurred in watersheds such as Rodgers Creek, to the east, as it is paramount don't You agree, to allow natural hydrology, that is the flow of the creeks in concert with an honoured urban forest.

In addition I am grateful for all of the associated materials, studies and documents, all of which have been invaluable.

What may be useful for all parties, all stakeholders, is a catch basin from which we can share our bibliographies of references that are relied upon, which give rise to our respective opinions and inform our ecological, hydrological and forest decisions.

Thank You for your attention. I respect the opportunity to put forward these, what are for me, very important considerations.

Sincerely,

CAUTION: This email originated from outside the organization from email address s. 22(1). Do not click links or open attachments unless you validate the sender and know the content is safe. If you believe this e-mail is suspicious, please report it to IT by marking it as SPAM.

Hello,

I read with interest the article today in the North Shore News, which mentions rising concern over noisy motor vehicle exhausts and Council's plea to the provincial government for more toothsome regulations.

I would like to add my voice to the concern. I live s.22(1) and there has been a huge increase in vehicle traffic to the park and on my street. Most people and vehicles are courteous and reasonably quiet but I am fed up in particular with Harley-Davidson motorcycles backfiring and bellowing up the hills s.22(1). The recent provision for and signage regarding overflow parking from the park on s. 22(1) has made the situation worse, as people cruise up and down the street looking for parking spaces. s. 22(1) is narrow, winding and steep and is inadequate if not dangerous for such traffic flow. I have watched park visitors urinate on s.22(1) tree after parking their car in the city-signed parking spot s.22(1)!

This used to be a quiet neighbourhood, but vehicle traffic and noise have negatively impacted the quality of life. It will also impact the value of real estate - who wants to have their days and evenings shattered by the staccato roar of a motorcycle or diesel pickup truck, and deal with litter and worse on their doorstep?

So, thanks for acting with regards to excessive motor vehicle noise. I would be happy to direct my concerns to the correct authorities if that would help your dialogue with them. In the meantime I would encourage West Van Council to think about and address the problems caused by increasing population density and traffic, and the causal link to Council decisions about development in our community.

Kind regards,
s. 22(1)

s. 22(1)

west Vancouver BC s. 22(1)

14 Apr 2021

Dear Councillors:

My name is s. 22(1) and I am a resident of West Vancouver. I am sending you this email to tell you that I do not support the expansion of Inglewood Care Centre as currently proposed. I could possibly support a much smaller and lower building height proposal.

There are other reasons why I oppose this spot re-zoning application:

- I feel outraged, despair and anger when I read that council is even contemplating moving this proposal forward. I am not opposed to senior care facilities, but the proposed development is far too large and not the right fit for our community; it is the equivalent of 2.6 Lions Gate Hospitals constructed at Taylor Way and Inglewood. This proposal is massive. The mass (4 buildings), height (up to 11 floors) and density (from 230 beds to 699 units – a 529% increase in Floor Area Ratio), is **completely at odds with West Van's small town, village character.**
- I am concerned about the environmental impact this project. The carbon emissions from just the demolition, clearing of land the construction and furnishing of the facility will be significant. In addition the year after year operating (heating, lights, maintenance) carbon emissions from the facility itself plus the consequential increase in carbon emissions associated with increase population, traffic, utility operations, and etc.). Council has passed a "Climate Emergency Resolution" and yet there is NO analysis of the environmental impact of just building the proposed structure.
- Based on the proposed living areas, 67% of this development is for condos and 33% is for senior care (Long Term Care and Assisted Living). This just sounds like a condo development dressed up and marketed as a senior care facility.
- This proposal is yet another example of spot-zoning and will set a precedent for the entire Taylor Way corridor. It should not be considered until a Local Area Plan has been completed. To do otherwise overrides a critical aspect of local community input as to the types of development residents want (or don't want) in their neighbourhood.
- There are currently 230 publicly funded long-term care beds at this location. This proposal provides NO increase in public care beds. **We need more publicly funded long-term care beds, not expensive, private-care facilities.** The benefits to the community do not outweigh the drawbacks. If a significant increase in density is requested there needs to be a significant increase in publicly funded long-term care capacity.

- I am concerned about the impact this project will have on infrastructure (roads, sewer systems, drinking water, community facilities and parks).
- While the use of this site for housing and a graduated care facility is acceptable, the massive size of the project, particularly within a single-family residential neighbourhood, is not acceptable.
- We need more publicly funded long-term care beds, not expensive, private-care facilities. Yet this proposal provides NO increase in public care beds. I could possibly support a much smaller building if all beds were designated publicly funded long-term care.
- I am concerned about the traffic impact the proposed development will have. Additional residents, visitors and support workers such as medical staff (doctors, nurses, physiotherapists, etc.) and maintenance workers (cleaning and commercial laundry services, deliveries, etc.), plus users of the contemplated child day care facility and Seniors Wellness centre will put undue pressure on already congested roads.

Please reject this proposal as currently presented to West Vancouver residents.

Being elected should mean accountability to those who elected them. Some on council feel they were elected to flow their own personal agenda. This is WRONG!

Thank you

Subject: Inglewood Campus of Care - in support

CAUTION: This email originated from outside the organization from email address [REDACTED] s. 22(1). Do not click links or open attachments unless you validate the sender and know the content is safe. If you believe this e-mail is suspicious, please report it to IT by marking it as SPAM.

Dear Sirs,

I write to express my support for the development proposed to update the Inglewood Private Hospital site to the Inglewood Campus of Care facility. There are many reasons to support this development, including:

- update of the care facilities to modern layout and standards;
- relocation of the care facility within the site;
- additional housing for workers both for this care facility and for others whose place of work is West Vancouver;
- reputable operator - Baptist Housing.

The proposed development checks A LOT of the boxes in the housing needs department. for our community. The need for care facilities in general in our community is high, and given our aging population we can expect even higher demand in the near future. Without a doubt, by meeting these high social needs, this development should be allowed to go ahead to application in advance of a local area plan. In fact, I feel it should be treated outside of the local area plan altogether. This is a rather chunky development, and one which was not likely anticipated when the community OCP was updated a couple of years ago. At that time, the anticipated growth or build out of the Taylor Way corridor was based on "steady as she goes" thinking. The needs for more attainable family based housing is still here, and the entire area is still a good one for building out family homes of the missing middle type - other than those attached to care facilities or targeted for a seniors demographic. My hope is that the Inglewood Campus of Care development be viewed as incremental to the current OCP vision for the Taylor Way corridor, and not as a fulfillment of the anticipated additional housing units currently described in the OCP.

Let us be mindful of balancing all future needs in planning our neighbourhoods, so that many segments of our community have a place to call home here. The location, Taylor Way, is too good to give up to only institutional needs and related housing thereto. With two schools within walking distance, as well as major transit and shopping within walking distance, the Taylor Way corridor is an ideal place for younger people with work careers ahead of them, and with families of young children. Let's make sure we balance these needs as well, and maintain a forward looking view when looking at the local area plan for this neighbourhood.

In summary:

YES to Inglewood Campus of Care.

YES to looking at an application in advance of a Local Area Plan for Taylor Way.

YES to treating the additional housing units as being in addition to the broader vision for the Taylor Way Corridor, not as a fulfillment of the most recent OCP vision..

BE OPEN to expanding the vision for housing needs in the Local Area Plan for Taylor Way Corridor, and avoid becoming stuck on a certain number of units..

Being a resident in the affected area, you may publish my name and street address in the public record without redaction.

Yours truly,
Christine Banham
950 Taylor Way
West Vancouver, BC.

Good morning,

Please find attached my letter of support for this thoughtful proposal.

Sincerely,

s. 22(1)

Dear Mayor and Council,

We are fortunate enough to be [s.22(1)] generation of our family living in the beautiful West Vancouver and we hope to be able to stay here with the generations that follow.

More imminently, my [s.22(1)] who has spent almost her entire life in West Vancouver, is now in a place where she will need to consider a residence like this. For these reasons, among others, I am writing to express my enthusiastic support for Baptist Housing's plans to redevelop the Inglewood Care Centre.

A facility like this would allow her, and the generations that follow, to have viable and attractive options to grow old while staying in our beloved community of West Vancouver. With the Maison for memory care down the street, this proposed project makes perfect sense for the Taylor Way Corridor.

Thank you very much for taking the time to read my letter.

Sincerely,

[s. 22(1)]

West Vancouver,

[s. 22(1)]

[REDACTED] s. 22(1)

West Vancouver

[REDACTED] s. 22(1)

19 Apr 2021

Dear Councillors:

My name is [REDACTED] s. 22(1) and I am a resident of West Vancouver. I am sending you this email to tell you that I do not support the expansion of Inglewood Care Centre as currently proposed. I could possibly support a much smaller and lower building height proposal.

There are other reasons why I oppose this spot re-zoning application:

- I feel outraged, despair and anger when I read that council is even contemplating moving this proposal forward. I am not opposed to senior care facilities, but the proposed development is far too large and not the right fit for our community; it is the equivalent of 2.6 Lions Gate Hospitals constructed at Taylor Way and Inglewood. This proposal is massive. The mass (4 buildings), height (up to 11 floors) and density (from 230 beds to 699 units – a 529% increase in Floor Area Ratio), is **completely at odds with West Van’s small town, village character.**
- Based on the proposed living areas, 67% of this development is for condos and 33% is for senior care (Long Term Care and Assisted Living). This just sounds like a condo development dressed up and marketed as a senior care facility.
- This proposal is yet another example of spot-zoning and will set a precedent for the entire Taylor Way corridor. It should not be considered until a Local Area Plan has been completed. To do otherwise overrides a critical aspect of local community input as to the types of development residents want (or don’t want) in their neighbourhood.
- I want a degree of predictability with zoning and development, yet this is another case of spot-zoning. **I strongly object to spot-zoning.** I despair that we are allowing developers to shape our community instead of residents. There is no point in having an Official Community Plan or Local Area Plans if Council continues to allow such significant exceptions.
- There are currently 230 publicly funded long-term care beds at this location. This proposal provides NO increase in public care beds. **We need more publicly funded long-term care beds, not expensive, private-care facilities.** The benefits to the community do not outweigh the drawbacks. If a significant increase in density is requested there needs to be a significant increase in publicly funded long-term care capacity.

- While the use of this site for housing and a graduated care facility is acceptable, the massive size of the project, particularly within a single-family residential neighbourhood, is not acceptable.
- We need more publicly funded long-term care beds, not expensive, private-care facilities. Yet this proposal provides NO increase in public care beds. I could possibly support a much smaller building if all beds were designated publicly funded long-term care.
- The benefits to the community do not outweigh the drawbacks. The majority of the proposed development is rental apartments and private, for-profit units. There must be a significant increase in publicly funded long-term care to offer true community benefit.
- I am concerned about the traffic impact the proposed development will have. Additional residents, visitors and support workers such as medical staff (doctors, nurses, physiotherapists, etc.) and maintenance workers (cleaning and commercial laundry services, deliveries, etc.), plus users of the contemplated child day care facility and Seniors Wellness centre will put undue pressure on already congested roads.

Please reject this proposal as currently presented to West Vancouver residents.

Thank you

Dear Mayor Booth and Members of Council,

On behalf of Moms Stop The Harm, I would like to thank you and council members for passing the resolution on the overdose crisis. Your support for a national action plan to end this crisis and your recognition that we are in the midst of a national public health emergency sends a strong message to our federal government that more must be done to save the lives of our children and other loved ones. In the midst of COVID, it is especially critical that our government do more to address the needs of those who struggle with this health crisis. We believe actions such as yours will make a difference. Again, our sincere thanks.

Regards,

Katherine Steinhoff
Municipal Lead, Moms Stop The Harm

HUB Supporter, we need your help!

As a concerned citizen, you can play a powerful role in motivating the provincial government to take bold action on promoting active transportation.

The groundwork has been laid, and now it's time to get moving.

The Ministry of Transportation and Infrastructure has recently made important strides to encourage active transportation in BC, but fewer than half the population are close to cycling facilities Comfortable for Most, and the cycling network remains disconnected.

[Use our letter writing tool](#) to write a letter to your MLA and Ministers responsible for increasing the investment in Active Transportation infrastructure.

Write a Letter

HUB Cycling recommends that the Province of BC:

- **increase funding for the Active Transportation grant to municipalities to at least \$45 million per year, and total government funding for cycling to \$100 million per year.**
- **proactively invest in projects that serve underserved and racialized communities and empower them to get to work affordably, quickly, and safely, and improve public health and quality of life in communities.**

[Use our letter writing tool to write a letter to your MLA now.](#)

Write a Letter

Thank you for your support in getting more people cycling, more often!

With gratitude,

Navdeep Chhina

Director of Campaigns & Inclusion

I share to help those unknowing of the full extent of these truths. Best wishes to all. I've watched, followed, the game-messes of Bill Gates for decades.

Getting persons in Africa to represent and attach to his plans is done simply with surplus dollars, and Pentagon approvals. Microsoft also a part of same. All Pentagon operating systems are Microsoft programs. Gates, as was his father, is of a 'world for US, not YOU'

Then the money counters embellish same: 'Our' former B of Canada Gov. Mark Carney, now a huge part of the World Economic Forum/WHO team toward this mess, as is Ms. Chrystia Freeland, a Rhodie monster.

Not a dream. Peter Koenig, a World Banker, and Robert Kennedy Jr. know it all well.

Hunger Strike in Italy to Stop 5G Deployment and Relaxed Cell Tower Radiation Limits; Includes Politicians, Doctors and Technicians

TOPICS:5GBN FrankItalyProtest
APRIL 17, 2021

By **B.N. Frank**

Cities worldwide AND entire countries have taken action to **ban, delay, halt, and limit 5G installation** AS WELL AS issue moratoriums due to economic, environmental, health, and public safety risks. In fact, the **majority of scientists worldwide** oppose deployment.

Since 2017, doctors and scientists have asked for moratoriums on Earth and in space (see **1, 2**). Since 2018, there have been reports of people and animals experiencing symptoms and illnesses after installation (see **1, 2, 3, 4**). Doctors, scientists, and telecom whistleblowers have also endorsed a **boycott on 5G phones**.

Opposition to 5G and more relaxed cell tower radiation limits in Italy has led to a hunger strike.

From **Environmental Health Trust**:

Stop 5G Hunger Strike

Stop 5G Hunger Strike

As of April 17, 2021, there are now 100 people in a hunger strike in Italy against 5G !

A hunger strike to stop 5G and to stop Italy from loosening their cell tower radiation limits was launched Tuesday 13 April 2021. It will continue until the final Italian parliamentary vote on wireless radiation threshold

limits. Italy, along with countries such as China, India, Russia and Switzerland have far more restrictive wireless/cell tower radiation limits compared to the United States, Australia and Japan. However industry is aggressively working to get these countries to weaken their more restrictive cell tower radiation limits in order to deploy 5G. *The vote could change the Italian wireless radiation thresholds from 6 V / m up to 61 V / m.*

*The initiative is promoted by the **Italian Stop 5G Alliance** and they also have [a petition](#) signed by over 62,000 people.*

Scientific research on 5G and 4G densification shows adverse effects from wireless proliferation. **Hundreds of scientists** are calling to halt 5G.

Members of Parliament are speaking out during session. “Dear colleagues, with the approval of the opinions, today you have once again betrayed the promise made to the Italian people to truly protect their health, favoring the Government in its intent to raise the limits on electromagnetic emissions by jumping from the current 6 V / m at 61 V / m to RADIATE US ALL, ALWAYS, EVERYWHERE, IN A MASSIVE WAY. Continue to trivialize the concerns of over 600 ITALIAN MUNICIPALITIES and to offend their mayors who are democratically opposed to the 5G experimentation,” **stated Hon. Sara Cunial.**

“To avoid the tenfold increase in the Italian limits on electromagnetic emissions approved by the Parliamentary Commission, Alleanza Italiana Stop 5G promotes a hunger strike. Activists, politicians, mayors, doctors and technicians have already joined. More than 62,000 signatures collected.”

“What **limits** are we talking about? Up to now the threshold in Italy has remained fixed at 6 V/m and 0.1 W/m², but the intention is to bring them respectively to 61 V/m and 10 W/m², however within the safety limits established by ICNIRP (International Commission on Non-Ionizing Radiation Protection). Let us remember that our country is the one that has so far imposed the most severe restrictions on this front among all those in the European bloc. Forcing operators to respect them, on the one hand reduces the emissions of each individual network infrastructure, but on the other pushes the telcos to install more on the territory in order to guarantee adequate coverage.”

As Dr. Joel Moskowitz points out, “In the U.S., the maximum permissible radio frequency radiation exposure limit for the general population (uncontrolled exposure) is 10 W/m² (10 watts per square meter) which is equivalent to the **ICNIRP** limit but 100 times the current limit in Italy.”

Italy has a very strong movement to stop 5G. Over 600 cities in Italy have passed resolutions to halt 5G until safety research has been completed. In March 2021 the **Stop 5G Marathon** was screened on Italy La Casa del Sole TV for 3 days with numerous speakers and experts including **Dr. Devra Davis and Theodora Scarato** of the Environmental Health Trust.

According to the Italian Oasisana.com

Stop 5G, in 57 cominciano lo sciopero della fame: “non alzate l’elettrosmog!”

“Increasing the current limits of exposure to electromagnetic fields in a generalized way and for 24 hours constitutes a clear violation of the right to health considering that even the limits currently in force DO NOT exclude the possibility of biological effects for chronic exposures; in the same way, the IARC (WHO) does NOT exclude the possibility of cancer from exposure to radio frequencies”- Giuseppe Miserotti (ISDE environmental doctor)

“ I am very ready AND VERY DETERMINED to protest against this that, as a technician who works at the National Institute of Nuclear Physics – and therefore also works with Radiofrequencies – I have no doubts to define: A SILENT AND PROGRAMMED MASS ASSASSINATION !” – Francesco Litrico

“ We are ready to fight all the way against all the abuses, injustices, prevarications and oppressions of the systems of power. United we win! “ Fabio De Gregorio

“ It is necessary to oppose with every form of civil resistance to this further abuse and potential damage towards citizens, which foresees a dangerous increase in electrosmog, tenfolding the current threshold limits set by law. We therefore ask the institutions to review the national plan proposal, maintaining the current threshold limits for electromagnetic fields”- Camillo Granchelli

“Enough electrosmog, the whole planet earth is in great danger”- Paola Manfrino

“ Stop 5G, let’s be strong not to succumb and let our planet succumb to the force of superpowers “- Roberta Bonardi

“ As an active part of the Stop 5G Emilia group, I join the hunger strike with pleasure and invite you to do so. Taking up the national appeal, we are organizing an operational online meeting in Bologna, to build critical mass and oppose with all our strength the raising of exhibition limits. Already at the current values of attention, biological effects and not only have been found, especially for children and the most fragile people, the electrosensitive, what we could all become . “ Angela Donati

“I protest against 5G and the raising of threshold limits that already hurt the current figurative values if they rise, it will be a continuous torture for both the electrosensitive and for other citizens. The ministers’ children will also be and the whole population will be microwaved and you know what the oven does when it turns on and cooks the food. We too will be cooked to perfection including the madmen who will change the law”. Luigi Lai

Legend who bought Appl at \$1.42 says buy TaaS no

[Get his top pick for free](#)

“ Because even a slave can no longer tolerate his meat being used indiscriminately as a commodity or as a means for all sorts of scientific experiments! This is unacceptable for any human being who understands that he is one. Stop to 5G, Stop to human experimentation. Let’s regain our natural fundamental rights ! “ **Claudio Bastrentaz**

“WE SAFEGUARD AND PROTECT MOTHER EARTH AND ALL THE INHABITANTS FROM AN ELECTROMAGNETIC POLLUTION WHICH, IN ADDITION TO SICKING US WITHOUT EXCHANGE, WILL TAKE OFF DIGNITY AND FREEDOM. NO 5G ” **Elisabetta Lombardi**

“ As an urban guinea pig, I abstain from the basic activity for living, the daily nourishment, so that those who govern Italy are sensitized to curb the wild invasion of artificial electromagnetic waves .” **Ombretta Diafarina**

“ With this form of protest I express my NO to raising the limits; I claim the right to health and, above all, that of our children. I am a member of the Alleanza Italiana Stop 5G and of the School Observatory, as well as the author of the book ‘Digital Children’ (The Green Lion) and a teacher of Higher Secondary School ”. **Mena Senator**

In France, Eugène Riguidel, the well known former winner of the double-handed Transat in 1979, **went on a hunger strike**, to oppose the installation of a 5G antenna 36 meters high on the outskirts of the village.

More at <https://oasisana.com/2021/04/13/stop-5g-in-42-cominciano-lo-sciopero-della-fame-non-alzate-lelettrosmog/>

In 2019 **The World Health Organization** warned that high levels of **Electromagnetic Fields** (aka “**Electrosmog**”) could cause health issues in a significant percentage of the population. A **petition was started** asking the organization to establish more protective universal **EMF** and **RF** exposure limits.

BC doesn't need 5G either. Fibre optics (broadband) are safer for health, faster than 5G, and can't be hacked!

Action in opposition to excessive EMR (electromagnetic radiation) rising across US. Are we asleep?

U.S. Senators Urge FCC to Include State, Local, and Tribal Input on Broadband Deployment; Opposition to 4G and 5G Increasing

TOPICS: 5GBN Frank Consumer Rights Telecom
APRIL 18, 2021

By **B.N. Frank**

The National Association of Telecommunications Officers and Advisors (NATOA) recently **published a report** recommending that the Federal Communications Commission (FCC) give telecom installation authority back to municipal governments. The FCC is supposed to protect Americans the telecom industry.

Because they have been catering to the industry instead (see [1](#), [2](#)), lawsuits have been filed against the agency for NOT protecting the public from unsafe levels of cell phone and WiFi radiation as well as unwanted and

unsafe 5G installation on Earth (see [1](#), [2](#), [3](#), [4](#), [5](#)) and **in space**. Telecom experts, *The Irregulars*, also filed a lawsuit against the FCC. **Americans have already paid** to have safer access to high-speed internet via fiber optics (see also [1](#), [2](#), [3](#), [4](#)), hence, the agency should NOT be giving more tax payer dollars to telecom companies to install unsafe technology (see [1](#), [2](#), [3](#), [4](#), [5](#)).

American opposition to 4G and 5G deployment continues to increase due to concerns about reduced property value (see [1](#), [2](#), [3](#)), public safety (see [1](#), [2](#), [3](#), [4](#), [5](#), [6](#)), health (see [1](#), [2](#), [3](#), [4](#), [5](#), [6](#), [7](#), [8](#)), cybersecurity and environmental risks. Some have referred to 5G deployment as a form of **“environmental racism”**. Senators are again asking that the FCC allow municipal input on installation. Maybe it’s because they don’t want wireless infrastructure installed in front of their homes or kids’ schools either.

From [Sierra Sun Times](#):

U.S. Senator Ron Wyden and Colleagues Urge FCC to Include State and Local Input in Broadband Buildout

April 3, 2021 – Washington, D.C. – U.S. **Senator Ron Wyden** on Friday joined with 16 colleagues in a letter to the Federal Communications Commission (FCC) urging that federal regulators ensure state, local, and tribal governments are included in efforts to update nationwide broadband maps.

Following decades-long use of inaccurate data maps that denied broadband funding to eligible communities, Congress charged the FCC with creating new maps in 2020 to accurately depict the current state of broadband access in our nation. These maps are a crucial tool in the FCC’s work to expand broadband to underserved and unserved communities across the country, and accurate mapping will help ensure that federal funds reach the areas that need it most. Incorporating feedback from state, local, and tribal governments will provide the FCC with more accurate, reliable, and up-to-date data.

“As the FCC considers how to best design a new broadband mapping data collection system, we strongly urge you to incorporate the voices of state, local and tribal governments and provide them with an opportunity to meaningfully challenge the data filed by internet service providers (ISPs),” the senators wrote Acting Chairwoman Jessica Rosenworcel. **“Many state and local governments know exactly who do and do not have access to reliable high-speed broadband within their communities.”**

“Improved and accurate national maps with precise information will allow policymakers to make strategic broadband investments to finally close the digital divide and the homework gap, expand telemedicine, improve economic and health outcomes for communities nationwide, and help our country recover from the coronavirus pandemic,” they wrote. **“Accurate mapping cannot be completed without insight from state and local officials, many of whom have created databases of their broadband capacity and needs and can help fill in valuable gaps. We urge the FCC to work with local, state and tribal entities to create a mechanism to allow them to challenge inaccurate broadband data.”**

In addition to Wyden, the letter led by U.S. Sens. Chris Van Hollen (D-Md.) and Amy Klobuchar (D-Minn.) was signed by U.S. Sens. Angus King (I-Maine), Kirsten Gillibrand (D-N.Y.), Raphael Warnock (D-Ga.), Joe Manchin (D-W.Va.), Patrick Leahy (D-Vt.), Tom Carper (D-Del.), Tammy Baldwin (D-Wis.), Michael Bennet (D-Colo.), Tina Smith (D-Minn.), Elizabeth Warren (D-Mass.), Bernie Sanders (I-Vt.), Maggie Hassan (D-N.H.), Dick Durbin (D-Ill.), and Patty Murray (D-Wash.).

Wyden also this week **urged the FCC** to make rural broadband a priority in 2021, expanding internet access to communities throughout Oregon and nationwide.

The full text of today's letter is [here](#).

Examples of 5G Small Cell Installations

Unfortunately – even where American input is being considered, the FCC has amended the “OTARD Rule” so that private property owners may install 5G and WiFi antennas to broadcast into neighborhoods **without obtaining a permit** or notifying anybody. Not kidding.

Subject: Redevelopment of 22nd St and Bellevue

CAUTION: This email originated from outside the organization from email address [REDACTED] s. 22(1). Do not click links or open attachments unless you validate the sender and know the content is safe. If you believe this e-mail is suspicious, please report it to IT by marking it as SPAM.

I am totally opposed to the current plan to redevelop the corner of 22nd and Bellevue.

I also oppose the plan to rezone the area.

The current plan does not comply with the current zoning by,laws

One unit per floor, 3000 sq feet would mean only those of considerable wealth would be able to purchase a unit It would not help those in the lower mainland needing a home.

The new build at 2175 and 2173 Argyle is much more appropriate and complies with the current bylaws and is attractive, this should be what replaces the current building at the corner of Bellevue and 22

Hello Mrs Mayor,

I am emailing you on behalf of two of our s.22(1) students, s.22(1), who have written letters to government officials to raise funds for the Harry Jerome track at West Vancouver Secondary School.

Please see the attached file for a copy of the letters that were sent out today.

Dear Mr Sturdy,

Our names are [s.22(1)] and we go to Mulgrave School. We are in [s.22(1)] class. We are pleased to be in touch with you even if it's online. We're both passionate about anti-racism and we have been learning about anti-racism in school this year. We have been learning about Black culture and Chinese Canadian racism and history. [s.22(1)] passionate about Black Lives Matter specifically and has written an article last year about Anti-Racism. This topic is very important to us because over the past few years, many innocent Black people have been killed.

You may have heard of the new track in West Vancouver High School and that they were naming it after Harry Jerome. We were quite excited to hear that they chose to name it after such an important person of color. They are trying to raise money to build the track and we were wondering if you could help with raising money for this. We believe this initiative is an important way to raise awareness and understanding about racism.

This would mean a lot to us and Mayor Booth because we believe that this track can lead to change. Thank you very much for your consideration.

Sincerely,

[s.22(1)]

Travel Within BC Restricted

Beginning on Friday, British Columbians will be [restricted from travelling](#) outside their local health region for nonessential purposes. Enforcement will happen through random roadside check stops. People caught defying orders will face fines.

On April 19, 2021 — The provincial government announced that it will be extending its [provincial health orders](#) that came into effect on March 29, 2021 at 11.59pm, for another five weeks until midnight on May 25, 2021, and that include:

- The variance allowing indoor religious gatherings and worship services between March 28, 2021 and May 13, 2021 is suspended.
- Indoor low intensity group exercise classes are cancelled.
- Restaurants, pubs and bars are closed for indoor dining. Outdoor patio seating and take-out or delivery is allowed.
- Whistler Blackcomb ski resort is closed.
- Workplaces with a COVID-19 exposure may be ordered to close for a minimum of 10 days.

In addition, to curb transmission across the province over the coming weeks, non-essential travel will be limited to within health authorities. Solicitor General

Mike Farnworth is expected to release details of a supporting order on Friday, April 23, 2021.

Circuit Breaker Business Relief Grant

***Please note that the circuit breaker restrictions have been extended through the May long weekend, and so have the grants.**

The Circuit Breaker Business Relief Grant provides fully funded grants to **hospitality and fitness businesses** impacted by the March 30, 2021 Provincial Health Officer (PHO) orders.

How the Grant Works

Grants of \$1,000 to \$10,000 are available to hospitality and fitness businesses impacted by the March 30, 2021 PHO orders on gatherings and events and liquor and food serving premises.

Grants are available until June 4, 2021 or until funds are fully expended, whichever comes first.

HOUSE OF COMMONS
CHAMBRE DES COMMUNES
CANADA

Patrick Weiler

Member of Parliament
West Vancouver-Sunshine Coast-Sea to Sky Country

April 14, 2021

Today, the Honourable Catherine McKenna, Minister of Infrastructure and Communities, announced the launch of the Green and Inclusive Community Buildings program across Canada to support green and inclusive community buildings through retrofits, repairs, upgrades, and new builds.

As part of the Strengthened Climate Plan, the program will deliver \$1.5 billion in funding over the next five years to projects that improve the places where Canadians gather, access services, and connect with others in the community, while saving energy, cutting pollution, and offering thousands of good jobs.

The program will invest in projects that meet a minimum threshold for energy efficiency improvements and that increase social inclusion in under-served and high-needs communities across Canada. Projects could include: the installation of energy efficient windows in public libraries; the construction of an Indigenous cultural centre built to green specifications; and, other such projects that would reduce energy waste, improve ventilation and contribute to inclusive community spaces.

Local governments, provincial and territorial governments, and not-for-profit and Indigenous organizations may now apply for funding through the Green and Inclusive Community Buildings program for projects that retrofit or build new publicly-accessible buildings that provide services to the public. At least 10 per cent of this funding will be allocated to projects serving First Nations, Inuit, and Métis communities, including Indigenous populations in urban centres.

Through the Green and Inclusive Community Buildings program, we will continue to work together to build a healthier environment, a healthier economy and more inclusive communities for all Canadians.

[For more information about the program and instructions to apply, please visit this webpage.](#) If you have any questions, please do not hesitate to reach out to our office. We stand ready to support your application in any way that we can.

Sincerely,

A handwritten signature in blue ink, appearing to be 'P. Weiler'.

Patrick Weiler, MP
West Vancouver-Sunshine Coast-Sea to Sky Country

HOUSE OF COMMONS
CHAMBRE DES COMMUNES
CANADA

Patrick Weiler

Member of Parliament
West Vancouver-Sunshine Coast-Sea to Sky Country

April 15, 2021

Every Canadian deserves a safe and affordable place to call home.

Today, the Honourable Ahmed Hussen, Minister of Families, Children and Social Development and Minister Responsible for Canada Mortgage and Housing Corporation (CMHC), and Adam Vaughan, Parliamentary Secretary to the Minister of Families, Children and Social Development and Minister responsible for Canada Mortgage and Housing Corporation (CMHC), announced \$40 million in funding for **“Getting Started”, the second round of the Housing Supply Challenge (HSC), which will be launched on June 9, 2021.**

The Housing Supply Challenge invites local solutions from across Canada that improve affordable housing pre-development processes from idea to shovel, and everything in between! For the “Getting Started” round, the following organizations are encouraged to apply:

- For-profit and not-for-profit organizations
- Indigenous organizations and groups
- Canadian post secondary institutions
- Government (provincial, territorial, Indigenous, municipal, local and regional)
- Teams composed of a variety of participants
- *All applicants must be affiliated with a legally incorporated organization

The Housing Supply Challenge is being delivered by Canada Mortgage and Housing Corporation (CMHC). Future rounds of the five-year challenge will tackle additional issues related to housing supply, including Northern Housing, Construction Technology, Scaling Solutions, and Public Perception of New Development.

For more information about the Housing Supply Challenge [please visit this webpage](#). If you have any questions or concerns, please feel free to reach out to our office.

Sincerely,

Patrick Weiler, MP
West Vancouver-Sunshine Coast-Sea to Sky Country

Dear Mr. Marley,

Thank you for your email. My name is Sheryl LeBlanc and I am the Manager of Bylaws & Licensing for the District. While Bylaw Officers are not authorized by the Province to enforce the Public Health Orders, our department works closely with West Vancouver Police (who are authorized to enforce), Vancouver Coastal Health Authority (who are also authorized to enforce), and other departments such as Parks, Culture and Community Services in our Covid efforts.

West Vancouver Police have informed that starting now, and weather dependant, they will be deploying extra resources on weekends, including Fridays and holidays to areas such as our parks and beaches. These Police officers will patrol these areas during busy times and will be conducting education and enforcement of the PHO orders. West Vancouver Police officers will also, when time and public safety priorities allow, add to the presence and enforcement of these areas.

In addition to the resources above, West Vancouver Bylaw Officers will also be partnering with District Parks Rangers to be in and around parks providing education on the COVID-19 social distancing guidelines.

Sincerely,

Sheryl LeBlanc
Manager, Bylaw & Licensing Services | District of West Vancouver

Subject: COVID rampant locally - Time for more enforcement of guidelines

CAUTION: This email originated from outside the organization from email address [REDACTED] s. 22(1) . Do not click links or open attachments unless you validate the sender and know the content is safe. If you believe this e-mail is suspicious, please report it to IT by marking it as SPAM.

FYI, I am forwarding a sobering assessment from the local 'COVID front lines'. It seems clear that more virulent strains of the corona virus have gotten more than a firm toehold in Metro Vancouver, including here on the North Shore. The weather forecast for the upcoming eight days or so looks encouraging for outdoor activities. Spring appears to have arrived.

In the circumstances, will the District immediately begin deploying by-law and police officers to politely but firmly enforce COVID distancing guidelines? And please, no more Nanny-State instructional signs. They are a blight on the landscape and utterly ineffectual. The same lack of efficacy can be claimed respecting the 'pool-noddlers', although they had the advantage of being rather amusing.

I ask that you leave my name and address on this e-mail.

An update from [REDACTED] s. 22(1)
 [REDACTED]:

APR 5
 I hope you had a wonderful Easter weekend. Beautiful

weather to top it off.

I wanted to reach out today because I think we all need to pay attention to the situation that is unfolding with CoVID. We are in a third wave. It is going to be a big one. And I am truly worried.

Here are some reasons.

1) Lions Gate Hospital's covid ward is full. We had to take over another entire floor to make room for covid patients. I have not seen it quite this bad since the beginning of the pandemic.

2) Many of the covid patients being admitted are 20-55 years old, and they need 100% oxygen. Some of these are healthy people with no preexisting health issues.

3) Variants of concern are growing so rapidly, it is very concerning to me. They are now the MAJORITY OF ALL COVID CASES IN BC. Data from Ontario public health officials found the B.1.1.7 (U.K.) variant, which has spread the furthest in B.C., led to a 60 per cent increase in both risk of death or hospitalization, and a 100 per cent greater risk of admission to intensive care. The P.1 variant from Brazil has affected many younger people. And I believe many of the 16 Canucks affected, some of whom are quite sick, most have a variant.

4) There is no clear evidence that the covid vaccines work as

effectively against the variants of concern. I personally have heard of a case of a patient who contracted a covid variant even after having gotten the first shot of a vaccine.

5) School transmission: this is a hard topic for me to weigh in, since the data is not as transparent. There definitely have been an increase in school clusters and exposures. But you'll be reassured to hear there have not been significantly sick children with covid requiring intensive care. However, there have been an increase in kids transmitting covid to their entire families. So whether you choose to send your kids back to school this week is a valid question. Try your best to get them to wear a mask at all times if possible. It really makes a difference for preventing covid transmission.

Overall, I wanted to let everyone know that I am really concerned with what's happening in this third wave. We need to hunker down and keep to our household bubbles. Don't travel. Don't take chances. Cancel non essential visits and travel. Please.

Daily cases are at a record high. Many of us are sick of hearing about it. Many of us are tired of all the restrictions. I get it. I'm tired of it all too. But now is not the time to turn a blind eye. Now is the time to pay attention. Now is the time to turn

on the news and listen
to Dr Bonnie Henry's
reports.
This is getting real.

Subject: RE: Motion on Overdose Crisis

Good morning.

Thanks very much for your attached email; it has been forwarded to me for a reply.

At their April 12, 2021 regular meeting, the Council of the District of West Vancouver passed the following resolution:

WHEREAS the opioid crisis has resulted in a death toll of over 16,300 in Canada between June 2016 and March 2020;

AND WHEREAS there were 1,716 overdose deaths last year in BC, representing the highest number of fatalities from any unnatural cause, including 6 fatalities in West Vancouver;

AND WHEREAS the national and provincial overdose crises show no signs of abating;

AND WHEREAS other countries have significantly reduced drug-related fatalities through harm-reduction and legislative reforms;

AND WHEREAS the Federal and Provincial governments have a responsibility to ensure that services and supports are in place to protect the well-being of all residents;

AND WHEREAS the District of West Vancouver is committed to supporting the health and well-being of residents and to work collaboratively with the community individuals, families, organizations and partners to improve outcomes;

AND WHEREAS the City of North Vancouver has recently passed a similar motion;

AND WHEREAS the status quo is unacceptable and present approaches are manifestly insufficient;

THEREFORE BE IT RESOLVED THAT the Mayor write to the Federal Government, in particular, the Minister of Health, on behalf of Council, requesting that the overdose crisis be declared a national public health emergency and be met with the same urgency observed in the Federal response to the Covid-19 pandemic;

AND BE IT FURTHER RESOLVED THAT the Mayor write to Premier John Horgan, on behalf of Council, requesting that he advocate for a national action plan that would work in tandem with provincial plans at a future First Ministers meeting;

AND BE IT FURTHER RESOLVED THAT the Mayor, in her letters to the federal and provincial governments, urge them to seriously consider measures such as decriminalization and proper funding of harm reduction, including safe supply.

The minutes of the April 12, 2021 regular Council meeting are scheduled for Council's review and adoption at the April 26, 2021 regular Council meeting.

Thanks again,

Pascal Cuk

Would it be possible to get the final wording of the motion on the overdose crisis that council passed at last night's meeting? Thank you very much for your assistance with this matter.

Sincerely,
Katherine Steinhoff
